

For GPP criteria:

Bidders must commit to provide the below list of literature and verification requirements during implementation following the award of the Contract.

Item	Description
Specification C50 and C51	<p><b>By signing this GPP Declaration Form, Bidders are declaring that the following materials/substances will not be used on site or in the building:</b></p> <ul style="list-style-type: none"> <li>• Products which contain sulphur hexafluoride (SF6).</li> <li>• Indoor paints and varnishes with a content of solvents (volatile organic compounds (VOCs) with a boiling point of 250°C maximum) higher than:</li> </ul> <p>a) For wall paints (according to EN 13300): 30 g/l (minus water).</p> <p>b) For other paints with a spreading rate of at least 15 m<sup>2</sup>/l at a hiding power of 98% opacity: 250 g/l (minus water)</p> <p>c) for all other products (including paints that are not wall paints and that have a spreading rate of less than 15m<sup>2</sup>/l, varnishes, wood stains, floor coatings and floor. paints, and related products): 180g/l (minus water).</p>
Specification F10	<p>The VOC emissions from the building products used must not exceed the respective values outlined in the European standard for the determination of emissions from building products EN ISO 16000-9 to -11, or equivalent.</p> <p><b>Verification:</b>  <b>By signing this GPP Declaration Form the Bidder is committing to provide a test report based on the outlined method in EN ISO 16000-9 to -11 or equivalent</b></p>
Specification K10	<p>The paper used in the manufacture of gypsum wall panels must be either from 100% recycled wood/paper and/or paper made of wood, wood fibres or wood particles stemming from legally harvested forests.</p> <p><b>By signing this GPP Declaration Form Bidders are committing to provide the following at contract implementation stage as means of verification:</b></p> <p><b>Verification a:</b>  Provision of appropriate documentation verifying that the paper or wood used is 100% recycled, i.e. from a national or EU certification scheme.</p> <p><b>Verification b:</b>  The legal origin of timber/wood fibres can be demonstrated with a chain-of-custody tracing system being in place. These voluntary systems may be 3rd-party certified, often as part of ISO 9000 and/or ISO 14000 or EMAS management system. Certificates of chain of custody for timber/wood fibres certified as FSC, PEFC or any other equivalent means of proof will also be accepted as proof of compliance. If timber/wood fibre stems from a country that has signed a Voluntary Partnership Agreement (VPA) with the EU, the FLEGT license may serve as proof of legality. Other means of proof that will be accepted includes a relevant and valid CITES certificate or other equivalent and verifiable means such as the application of a "due diligence" system.</p> <p>For the non-certified virgin material bidders shall indicate the types (species), quantities and origins of the timber/wood fibres, together with a declaration of their legality. As such the timber/wood fibres shall be able to be traced throughout the whole production chain from the forest to the product.</p>
Specification K10	<p>The legal origin of timber/wood fibres can be demonstrated with a chain-of-custody tracing system being in place. These voluntary systems may be 3rd-party certified, often as part of ISO 9000 and/or ISO 14000 or EMAS management system. Certificates of chain of custody for timber/wood fibres certified as FSC, PEFC or any other equivalent means of proof will also be accepted as proof of compliance. If timber/wood fibre stems from a country that has signed a Voluntary Partnership Agreement (VPA) with the EU, the FLEGT license may serve as proof of legality. Other means of proof that will be accepted includes a relevant and valid CITES certificate or other equivalent and verifiable means such as the application of a "due diligence" system.</p> <p>For the non-certified virgin material bidders shall indicate the types (species), quantities and origins of the timber/wood fibres, together with a declaration of their legality. As such the timber/wood fibres shall be able to be traced throughout the whole production chain from the forest to the product.</p> <p>The gypsum content must be at least 2% recycled gypsum board (by weight, based on an annual average, not including gypsum taken from FGD sites). Where higher percentages are possible these should be selected in preference.</p> <p><b>Verification:</b>  <b>By signing this GPP Declaration Form, the Bidder is committing to provide appropriate proof that this criterion is met at contract implementation stage. For example, the supply of quality control or production documentation .</b></p>
Specification K10	<p>Information on wall covering materials, such as paint types, that will not hinder the recycling or diversion of gypsum plasterboard at end-of-life must be made available.</p> <p><b>By signing this GPP Declaration form the Bidder is committing to the following at contract implementation stage as a means of verification:</b></p>

	<p>Products holding a relevant Type 1 Ecolabel fulfilling the listed criteria will be deemed to comply. Other appropriate means of proof will also be accepted.</p> <p>Appropriate and acceptable user information describing the handling, installation procedures, surface treatment applications, recycling and/or disposal methods shall be provided with the product or on the packaging or labels.</p> <p>Verification:</p> <p>Compliance with these requirements shall be demonstrated by providing examples of labels, packaging and point of sale information. Other appropriate means of proof will also be accepted.</p>
Specification K10	<p>The bidder must demonstrate that the contractor installing the wall panels has in place effective policies and procedures to ensure that waste arising from the installation, i.e. off cuts, trimming losses, damaged boards etc. is properly dealt with in a sustainable manner, such as recovery, recycling or diverting from landfill where possible through an appropriate collection scheme.</p> <p>By signing this GPP Declaration form the Bidder is committing to the following verification at contract implementation stage:</p> <p>Possible means of proof include EMAS and ISO 14001 certificates or equivalent certificates issued by bodies conforming to Community law or the relevant European or international standards concerning certification based on environmental management standards. Other appropriate means of proof will also be accepted</p>
Specification K41 & M40	<p>No substances or preparations that are assigned any of the following phrases (or combinations thereof) as laid down in Council Directive 67/548/EEC and its subsequent amendments may be added to raw materials.</p> <p>By signing this GPP Declaration form the Bidder is committing to the following at contract implementation stage as a means of verification;</p> <p>Possible means of proof include EMAS and ISO 14001 certificates or equivalent certificates issued by bodies conforming to Community law or the relevant European or international standards concerning certification based on environmental management standards. Other appropriate means of proof will also be accepted.</p>
Specification K41 & M40	<p>Energy Consumption</p> <p>Processed Products Only:</p> <p>The energy consumption shall be calculated as process energy requirements (PER) for agglomerated stones and terrazzo tiles or as energy requirement for firing (ERF) for ceramic tiles and clay tiles. Not applicable to concrete paving units.</p> <p>By signing this GPP Declaration form the Bidder is committing to the following verification at contract implementation stage:</p> <p>Products holding a relevant Type 1 ecolabel fulfilling the listed criteria will be deemed to comply Other appropriate means of proof will also be accepted</p>
Specification M20 & M60 & Z11 & Z31	<p>Bidders must declare that the following materials/substances will not be used in the building:</p> <ul style="list-style-type: none"> <li>• Products which contain sulphur hexafluoride (SF6).</li> <li>• Indoor paints and varnishes with a content of solvents (volatile organic compounds (VOCs) with a boiling point of 250°C maximum) higher than: <ul style="list-style-type: none"> <li>a) For wall paints (according to EN 13300): 30 g/l (minus water).</li> <li>b) For other paints with a spreading rate of at least 15 m<sup>2</sup>/l at a hiding power of 98% opacity: 250 g/l (minus water)</li> <li>c) for all other products (including paints that are not wall paints and that have a spreading rate of less than 15m<sup>2</sup>/l, varnishes, wood stains, floor coatings and floor. paints, and related products): 180g/l (minus water).</li> </ul> </li> </ul> <p>Verification;</p> <p>By signing this GPP Declaration Form, Bidders are declaring that the above mentioned materials/substances will not be used on site or in the building:</p>
Specification N30	<p>All sanitary and kitchen water facilities must be equipped with the water-saving technologies available on the market such as, but not limited to:</p> <p>Dual flush WCs should use a maximum of 6 litres for full flush and 3 litres for urine flush.</p> <p>Water saving devices fitted into cisterns must demonstrate water saving of at least 30% for toilet flushing.</p> <p>Tap inserts should save at least 50% of water compared to normal tap use.</p> <p>By signing this GPP Declaration form the Bidder is committing to the following at contract implementation stage as a means of verification;</p> <p>Bidders must provide technical data-sheets for the products to be installed that verify compliance with the specifications</p>

I / We declare that we confirm that should we be awarded this Contract, I/we will abide by the above requirements and we will provide the requested information and verification processes as listed above. I/We understand that failure to comply with the above will result in infringement to the Contract requirements and that the Contracting Authority will have the right to impose a penalty of Euro 5,000 per infringement up to a maximum of 5% of the contract value.
